

## PAPER & PULP APPLICATIONS

### ELBA UNIVERSAL GEAR OIL

Excellent for lubrication of gears on cranes and debarking drums found in wood yards of paper and pulp production facilities. Universal Gear Oils feature superior rust and corrosion protection while offering superior oxidation and anti-foaming resistance. Additionally they have unmatched EP and load carrying performance and are made in multi-viscosity grades for great applicable usage. These products are excellent for usage on pumps and paper machines due to their tenacious texture and resistance to water washout and excellent water separating characteristics.

### ELBA FOODPLEX AC

Foodplex Grease can be used in lumber and pulp/paper machinery where staining or contamination is a concern and is also recommended for textile machinery bearings.

### ELBA BC 2M

Helps resist water intrusion while providing unmatched levels of high temp and extreme pressure performance. This is excellent grease for lubrication of screw conveyors and paper machines. Elba BC 2M is a problem solving lubricant for wet ends of paper machines due to its superior water wash out and water resistance while having a strong affinity for metal parts

### ELBA PREMIUM MP GREASE

An excellent high-performance bearing grease for washers and bearings/electric motors due to its superior anti-wear properties and long grease life while also offering superior water wash out resistance due to its CSC thickening system
