

ELBALUBES FGCS SERIES

ElbaLubes FGCS grease is a 100% synthetic calcium sulfonate thickened lubricating grease created specifically for the food and beverage industries. Its special additive system provides superior water spray off and water wash off properties. It offers excellent anti-wear properties, extreme pressure properties, oxidation resistance, and protection from rust and corrosion. The synthetic base stock gives ElbaLubes FGCS exceptional low temperature properties and thermal stability over a wide temperature range.

ElbaLubes FGCS grease meets USDA 1998 (H1) guidelines for lubricants with incidental food contact. It is ideal for the lubrication of cookers and other equipment used in meat/poultry processing, fruit/vegetable processing, and bakeries where higher operating temperatures are a concern.
